2 Company update

2.1 Changes to the Recapitalisation Proposal

Since the approvals received from Shareholders at the Company's general meeting on 30 June 2017, certain changes to the Recapitalisation Proposal have been agreed between the Company, Pearl and Keshi. These changes are detailed below and constitute a fundamental change in the terms of the transaction from those approved by Shareholders. Consequently, further Shareholder approval is being sought to implement the Recapitalisation

For personal use only

Proposal (as varied) at the Company's general meeting to be held on 1 December 2017:

- J The original transaction structure incorporated an exclusive option for Pearl to purchase 100% of the total issued shares of Keshi (the owner of the intellectual property underpinning Pearl's business operations) in consideration for an issue of "B" class shares in Pearl. The terms of the proposed option and the "B" class shares were set out in the explanatory statement accompanying the Company's notice of meeting dated 30 May 2017 and in the Replacement Prospectus. As a result of feedback received from the ASX in relation to the "B" class shares in Pearl, the option has been terminated. In place of the option, Pearl and Keshi have agreed, within the 12-month period commencing on 20 October 2017, to negotiate in good faith to agree the terms of a purchase by Pearl from Keshi of the intellectual property underpinning Pearl's operations.
- J The second change is that, as a result of the extended timeframe until the anticipated date for re-quotation of the Company's securities on ASX, Pearl has issued Series B Convertible Notes in order to provide it with additional working capital over this period. The Pearl Series B Convertible Notes are on substantively identical terms to the Pearl Series A Convertible Notes, save that on conversion in connection with the Recapitalisation Proposal they will convert into Shares at a deemed issue price of \$0.20 per Share (being the price per Share under the Public Offer), with no attaching options.

As a result of the above changes and the requirement to obtain fresh Shareholder approvals to implement the Recapitalisation Proposal, the offers under the Replacement Prospectus (including the offer to the Series B Convertible Noteholders, as set out in Section 3 below) remain subject to Shareholder approval of the Resolutions set out in the Company's Notice of Meeting dated 30 October 2017.

2.2 Status of Pearl's development approval application

Pearl is required to have in place a licence from the Queensland Department of Environment and Heritage Protection under the Environmental Protection Act 1994 (Qld) (**EPA Approval**) to operate the TDUs at its Queensland site.

On 28 June 2017, Pearl was granted an EPA Approval "Environmental authority number EA0000862". This approval covers up to 4 TDUs at Pearl's Stapylton site only. This EPA Approval took effect on 5 October 2017, being the date on which Pearl obtained development approval under the *Sustainable Planning Act 2009* (Qld) in respect of its Stapylton site (**Development Approval**).

The EPA Approval and the Development Approval granted to Pearl contain a series of conditions which must be satisfied and complied with on an ongoing basis, in order for Pearl to be able to carry out operations under those approvals. These include conditions relating to noise control, land

contamination, air contamination, water contamination and reporting requirements in relation to emergency events and their impact on nearby infrastructure to the Stapylton site.

6 Refreshment of statutory periods

Further, in accordance with sections 723(2) and 724 of the Act, if a person offers securities under a disclosure document such as a Prospectus and the disclosure document states a minimum subscription amount must be raised before any securities will be issued, then the minimum subscription must be received within four (4) months after the date of the disclosure document, otherwise Applicants must be given a supplementary disclosure document and the opportunity to withdraw their Application (in certain circumstances) or all Application Monies must be returned.

By the issue of the Instrument, ASIC has varied the Act to allow companies to refresh the timing of minimum subscription and quotation conditions, to commence from the date of a refresh document (i.e. this Second Supplementary Prospectus), such that the respective three and four month periods are taken to commence from the date that the refresh document is lodged with ASIC. The Instrument imposes a number of requirements as to the content of the refresh document and on the company issuing the refresh document. This Second Supplementary Prospectus addresses those requirements.

This Second Supplementary Prospectus is to be read with the Refresh Supplementary Prospectus dated 4 October 2017 and the Replacement Prospectus dated 21 August 2017, issued by Citation Resources Limited ACN 118 710 508 (Subject to Deed of Company Arrangement) which replaced the original prospectus issued by the Company dated 10 July 2017.

Citation has entered into an acquisition agreement to acquire 100% of the issued share capital of Pearl. Under the principles of AASB 3: "Business Combinations" Pearl is the accounting acquirer in the business combination. Therefore, the transaction has been accounted for as a reverse acquisition without recognising any goodwill. Accordingly, the

consolidated financial statements of Citation have been prepared as a continuation of the financial statements of Pearl.

The consideration in a reverse acquisition is deemed to have been incurred by the legal subsidiary (Pearl) in the form of equity instruments issued to the shareholders of the legal parent, Citation. The acquisition date fair value of the consideration transferred has been determined by reference to the fair value of the issued shares of Citation immediately prior to the business combination.

The deemed acquisition cost has been determined by using the fair value of Citation at 20 cents per share. Therefore the deemed acquisition cost is 9,250,694 shares x 20 cents which amounts to \$1.85 million less the net assets of Pearl at acquisition date, being ((\$0.93) million, net assets of Pearl at 30 June 2017), which equates to \$2.78 million and has been recognised in an acquisition reserve account.

Conclusion

Historical and Pro Forma Financial Information

Based on our independent review, which is not an audit, nothing has come to our attention which causes us to believe that the Historical and Pro Forma Financial Information of Citation and Pearl described in the “Financial Information” section of the Supplementary Prospectus does not present fairly:

- Summary audited consolidated historical statement of profit or loss and other comprehensive income for FY2015, FY2016 and FY2017 for Citation;
- Summary audited consolidated historical statement of profit or loss and other comprehensive income for FY2015, FY2016 and FY2017 for Pearl;
- Summary audited consolidated historical statement of cash flows for FY2015, FY2016 and FY2017 for Citation;
- Summary audited consolidated historical statement of cash flows for FY2015, FY2016 and FY2017 for Pearl;
- The audited consolidated historical statement of financial position for Citation as at 30 June 2017;
- The historical pro forma consolidated statement of financial position of Citation as at 30 June 2017; and
- The pro forma transactions set out in Schedule 1 – Section 1.7 of the “Financial Information” section are a reasonable basis for the historical pro forma consolidated statement of financial position as 30 June 2017;

in accordance with the measurement and recognition requirements (but not all of the presentation and disclosure requirements) of applicable Accounting Standards and other mandatory professional reporting requirements under AIFRS as if the pro forma transactions set out in in Schedule 1 – Section 1.7 of the “Financial Information” section had occurred at 30 June 2017.
