3. Target market

The objectives, financial situation and needs of investors which are suitable for investment in the Options and an explanation of why those particular financial circumstances are suitable are provided below:

Investment objective	<p>As the Options may be exercised at any time prior to the Expiry Date, the Issuer expects that an investment in the Options will be suitable to investors who wish to have the right, but not obligation, in the medium term to acquire the Issuer's shares and have exposure to the Issuer's current products and pipeline of future products.</p> <p>The Options are for those who:</p> <ul style="list-style-type: none"> • are entitled to apply for them under the Prospectus; • seek to profit from an appreciation in the market price of Shares in the Company, and/or who have a medium to long-term view on the Shares or the underlying assets of the Company; and • who are accustomed to investing in speculative investments in the microcap industrial sectors.
Investment timeframe	<p>The Options will only be issued to investors under the Placement and SPP (and SPP Shortfall), and consequently have been designed for consumers who:</p> <ul style="list-style-type: none"> • have acquired or will acquire Shares under the Placement or SPP; • have the ability to consider the economic risk of the exercise of the Options; • given the speculative nature of the Shares and Options, have adequate means to provide for their current needs and to withstand a loss of the entire investment of the Shares and Options; • have such knowledge and experience that they are capable of evaluating the merits and risks of exercising the Options; • take a medium-term outlook in relation to their investment in the Issuer and are in a financial position that is sufficient for them to invest their funds over the time period to the Expiry Date, should they wish to exercise their Options; and • have determined that the Shares and Options are a suitable investment.
Investor suitability metrics	<p>While the Issuer does not have an established eligibility framework for Investors based on metrics (for instance employment status, income levels, age or an expected return or volatility) it is expected that the target market of investors will be those investors that wish to obtain optionality for exposure to the Issuer's targeted future growth.</p> <p>Only Eligible Shareholders and Placements participants – who are already investors in the Issuer, professional and sophisticated investors and professional and sophisticated investors who participate in the SPP Shortfall, will be permitted to apply for Options.</p>
Risk	<p>The Issuer considers that an investment in the Options will have a different risk profile to a direct upfront investment in Shares, including due to the fact that there is no obligation to exercise the Options prior to the Expiry Date.</p> <p>Investors should also have a sufficient level of financial literacy to</p>

	understand and appreciate the risks of investing in options as an asset class generally and the more specific risks of investing in the Issuer.
Excluded class of consumers	<p>The Options are not suitable for investors:</p> <ul style="list-style-type: none"> • who are not seeking to have the potential to increase their investment in the Issuer; • who do not understand and appreciate the risks of investing in options as an asset class generally and the more specific risks of investing in the Issuer; • who require an income stream from their investment; • who do not ordinarily invest in speculative investments in the microcap industrial sectors; and • with respect to the SPP, who are residents outside Australia and New Zealand and are not applicants under the SPP.

The Issuer has assessed the Options and formed the view that the Options are likely to be consistent with the objectives, financial situation and needs of investors in the target market as described above in this section 3.

4. Distribution conditions and restrictions

The Options will also be subject to the distribution condition that investors will be provided with a copy of the Prospectus before they apply for Options, and access to this TMD.

The key restrictions on distribution for the Placement Offer are that the Options will only be offered and issued to participants in the Placement.

The key restrictions on distribution for the SPP Option Offer are that the Options will only be offered and issued to Eligible Shareholders who participate in the SPP (or investors who participate in the SPP Shortfall).

The Issuer considers that these distribution conditions will ensure that persons who invest in Options fall within the target market in circumstances where personal advice is not being provided to those persons by the Issuer.

5. Review triggers

The Options are being offered for a limited offer period set out in the Prospectus, after the conclusion of which the Options will no longer be available for investment. It follows that the TMD will only apply in the period between the commencement of the offer of the Options under the Prospectus and three months following the Closing Date (the end date for any offers of the SPP Shortfall) (**Offer Period**), after which the TMD will be withdrawn.

To allow the Issuer to determine whether circumstances exist that indicate this TMD is no longer appropriate and that distribution of the Options should cease, the following review triggers will apply for the Offer Period:

- (a) there is a material change to the Options' key attributes that make it no longer consistent with the likely objectives, financial situation and needs of clients in the target market;
- (b) it is apparent that Shareholders will not approve the issue of Options by the requisite majority;
- (c) the Issuer lodges with ASIC a supplementary or replacement prospectus in

relation to the Prospectus;

- (d) the occurrence of a significant dealing in Options that is not consistent with this TMD;
- (e) the Issuer identifies a substantial divergence in how the Options are being distributed and purchased from this TMD;
- (f) an unexpectedly high number of complaints are received from customers that indicate the Options are not suitable for the target market or the product is not being distributed to the target market; and
- (g) material changes to the regulatory environment that applies to an investment in the Options.

The Issuer may also amend this TMD at any time.

6. Review

If a review trigger occurs during the Offer Period, the Issuer will undertake a review of the TMD in light of the review trigger as soon as reasonably practicable and, in any case, within 10 business days of the review trigger occurring.

Periodic reviews of the TMD will occur regularly during the Offer Period and will be revised before the Closing Date for the SPP, noting that the Offer Period is just over one month. If the Offer Period extends for more than one month, the TMD will in addition be reviewed on a monthly basis.

7. Reporting requirements

As the Issuer is not appointing external distributors of the Options in respect of retail clients, the Issuer will consider any of the following matters:

- (a) complaints received by the Issuer in relation to the Options;
- (b) significant dealings in the Options which are inconsistent with this TMD;
- (c) any dealings outside the target market (to the extent that the Issuer is aware of such dealings); and
- (d) the conduct of the Issuer under this TMD.

Where relevant, the Issuer will consider any of the above matters and determine appropriate steps that will be taken including, where appropriate, reporting of matters to ASIC.

8. Authorisation

This TMD was approved and authorised by the Board of the Company.
